

Did You Know...

Pharmacists do more than just fill your prescription?

While you are waiting for your prescription to be filled, your pharmacist is:

- Making sure this is the best dose for you
- Reviewing your medications to see if they can be taken safely together
- Helping you get the most from your insurance

Pharmacists must attend college for at least six years to earn their pharmacy degree? Pharmacists go through extensive training to ensure they can provide you with the best healthcare possible.

Pharmacists welcome and encourage their patients to ask questions? Pharmacists need to know all medications you are taking (prescription, non-prescription, samples, natural, and herbal) to better serve you. Your pharmacist can provide you with the information you need.

Pharmacists can help save you a trip to the doctor or emergency room? By educating you on the proper use of your medication(s), additional doctor office or emergency room visits can be avoided.

To learn more about the role pharmacists play in your healthcare management, talk to your pharmacist.

Ohio Pharmacists Association
for pharmacists. for patients. for you.
