

Join OPA's Rx Advocacy Team

The most effective way to protect and enhance the profession of pharmacy is at the local level, where crucial relationships with legislators are formed. To assist our legislative efforts, OPA would like to know which state and U.S. Representatives and Senators you are familiar with, or if you are interested in getting to know your legislators for the first time.

Legislators like to hear from pharmacists from their districts, and you have a unique opportunity to serve as your legislator's pharmacy information source!
